

## Hydro 2016 at hand in Rostock-Warnemünde

The German Hydrographic Society (DHYG) to stage the International Federation of Hydrographic Societies' (IFHS) 2016 symposium and exhibition in Rostock-Warnemünde, Germany, from 8-10 November 2016. Venue will be the spacious Yachthafenresidenz Hohe Düne Hotel overlooking the Baltic Sea.

More than 300 participants from all sectors of the hydrographic and related professions are envisaged and 48 exhibitors will provide their latest developments. Presentations in 14 sessions will cover the emerging topics ranging from the Perspectives of Hydrographic to Space Hydrography, covering strategic, practical and technical issues. All this accompanied by specialist workshops, on-water demonstrations and open ships.

## Promotion of young hydrographers

A very important factor of this event is to attract young people and to support and promote young hydrographers. Student awards are being presented to extraordinary papers and presentations and on Wednesday afternoon the exhibition is open to the public without entrance fee.

## Cooperation of IFHS and IHO

It is a perfect coincidence that on the first day of the conference, the revised convention of the International Hydrographic Organization (IHO) will enter into force. The conference will be honored by the participation of the then former President of the IHB as the new Secretary General of the IHO addressing the audience on his very first day of taking office.

## More Information

Further general information on Hydro 2016, including venue, conference programme and registration, is available online at [www.hydro2016.com](http://www.hydro2016.com). Sponsors of the English-language symposium, which will be the second such event to be held in Rostock-Warnemünde under the auspices of the DHYG on behalf of the eight-member IFHS, include Atlas Elektronik, Caris, Fugro, German ROV, Innomar, QPS, SBG Systems, SevenCs and Wärtsilä Elac Nautik.
